

The background is a full-page abstract watercolor illustration in various shades of blue. It features fluid, organic shapes that resemble ink or paint swirling and bleeding into each other, creating a sense of movement and depth. The colors range from light, airy blues to deeper, more saturated tones, with some areas showing darker, more concentrated pigments.

Where water is  
life stories

## *Where Water Becomes Life Stories.*

*We transmit vibrations in sound through the words we speak. The movements of our actions radiate frequencies and tones, which the element of water responds to fluidly.*

*Some actions preform differently, example when admired day by day we view calmness, halcyon, balmy, and peacefulness. When pushed to the limit, overwhelm us into becoming enraged, drained, stagnant or paralyzed.*

*Cherree's [Splashes](#) of empathic energies results in her viewers being astonished by of her creativity.*

*Through the dry brush medium Cherree transforms the molecules which unify as soulmates onto paper.*

*Her body of work, tiled "[Splashparentices](#)" is about the different vibrational frequencies we transmit through fluid water and how it becomes her life stories to tell*

*Water has always been my release of negativity.  
For me, and others, being around water has the power to calm.*

*Author and Scientist Masaru Emoto claimed that human  
consciousness could affect the molecular structure of water.*

*He said that human's positive thoughts and words could cure  
polluted water. Further, Emoto said prayer and positive  
visualization could clear dirty water.*

*He firmly believed that water was a  
“blueprint for our reality” and that emotional “energies”  
and “vibrations” could change its physical structure.*

*This led me to create my “[Splashparencies](#)”*
